

## PROFILE

Working as a professional musician and singer for many years, and now a voiceover artist, allows me a unique perspective on vocal performance and audio production and how they impact audiences of all kinds.

I have been the voice of a friendly neighbor, a knowledgeable expert, an energetic salesman, a recognized authority, a caring friend or colleague, a storyteller, and much more!

I record at my private studio near Los Angeles, California utilizing a Shure KSM-44 large diaphragm condenser microphone. I edit and master the audio in Adobe Audition sound editing software and I can deliver the final product in virtually any audio file type, resolution, or bit rate. I can provide select sync-to-video capabilities using Adobe Premiere video editing software. Consultations and directed sessions are supported via Zoom, Google Meet, or your preferred audio/video communications software.
